Achievements, Milestones and Overview

Profile: Santosh Nyaupane (Dhakeswor)

Availability: ASAP

Location: Finland

Work Preference: Onsite / Hybrid / Remote

Email: santoshneupane17@gmail.com

Mobile: +358449684333

Certificates:

Google IT Support Professional and other more can be found in LinkedIn.

https://www.linkedin.com/in/santosh-nyaupane-182745139/

Projects: FrontEnd, BackEnd, API and LLM

I have more than 25 projects on GitHub. You can find the source code in the GitHub links. I'll list a few projects below along with their Vercel links and source code at the end of this file.

GitHub https://github.com/Dhakeswor17

Role	Company
Data Canter Technician	Google
Senior Lab Engineer	Microsoft
Lab Engineer	Microsoft
Freelance Field Engineer (IT Support)	SSE Global Technologies Inc
IT Support Specialist + Desktop Support Engineer	Bhatbhateni

Process Optimization:

- Implemented changes to the 5S layout and process for Disk Erase (DE) to Align with Google's global data security policy.
- Created and scripted an inventory sheet with an automated alert system for ordering and logistics, preventing supply bottlenecks.
- Support capacity planning for racks, power, cooling, and network utilization.
- Maintain inventory management for servers, networking equipment, and spare parts.
- Follow and enforce change management, incident management, and escalation procedures.

Hardware Deployment and Maintenance:

- Install, rack, and cable servers, network gear, and storage systems
- Perform component swaps (drives, DIMMs, PSUs, fans, motherboards, CPU, etc.)
- Run diagnostics and verify system health after repairs
- Decommission hardware following security and disposal procedures

Troubleshooting and Incident Response:

- Respond to alerts and escalate issues when needed.

- Diagnose hardware faults using logs, internal tools, and vendor utilities.
- Support network teams by checking cabling, optics, and port status.
- Troubleshoot and resolve hardware, network, and operating system issues across production and non-production environments.
- Execute firmware upgrades, system patches, and hardware lifecycle replacements.

Data Security and Drive Handling:

- Perform secure disk erasure and destruction processes.
- Maintain compliance with internal and external security standards.
- Track and handle media following strict chain-of-custody procedures.

Cable and Infrastructure

- Manage Fiber and copper cabling (patching, labelling, tracing)
- Support power-related tasks including PDU installs and load checks
- Monitor environmental conditions and report anomalies

Microsoft

- Led cleanroom operations and ensured adherence to stringent safety and quality standards, contributing to the successful production of HoloLens devices.
- Successfully navigated the IVAS product lifecycle, working through versions 1.0, 1.1,
- and 1.2.
- Managed fabrication processes, utilizing advanced nano technology and ALD techniques to enhance product quality and efficiency.
- Oversaw production workflows, optimizing procedures to improve output and reduce downtime.
- Implemented rigorous quality control measures, ensuring all products met Microsoft's high standards for performance and reliability.
- Collaborated with cross-functional teams to troubleshoot and resolve production issues, maintaining seamless operations.
- Trained and mentored junior lab operators, fostering a knowledgeable and skilled team environment.
- Managed two production teams through severe personnel shortages, working extensive hours (average 16 hour days) for several months to ensure shipment dates, KPIs, and
- quality standards were all met.
- Created 5S daily checklists and optimized data collection, correcting inaccurate information and preventing misleading reports in Power BI.
- Tasked by senior management to revamp departmental culture and the work environment, achieving a significant turnaround.

SSE GLOBAL TECHNOLOGIES INC.

- Completed minor preventative maintenance and mechanical repairs on equipment.
- Resolved problems, improved operations, and provided exceptional service.
- Identified issues, analyzed information, and provided solutions to problems.
- Performed routine maintenance on security equipment by cleaning monitors, installing and adjusting cameras for proper focus and depth of field.
- Worked closely with network administrators and server engineers to deliver quality service.

Bhat-Bhateni Supermarket and Departmental Store

- Provide onsite and remote technical support to end users.
- Install, configure, and troubleshoot desktops, laptops, and peripheral.
- Support Windows/macOS operating systems and business applications.
- Manage user accounts, permissions, and access control.
- Install, configure, and maintain IT systems, devices, and basic servers
- Perform system updates, imaging, and device deployments.
- Assist with new user setup and IT asset management.
- Troubleshoot network connectivity (LAN, Wi-Fi, VPN).
- Monitor systems, apply patches, updates, and security policies.
- Maintain system backups, documentation, and IT procedures.
- Coordinate with vendors, internal IT teams, and end users.
- Assist with new employee onboarding (device setup, account creation).
- Help maintain network devices (switches, routers, firewalls)

Technical Skills Matrix

Skill Area	Core Competency	Platforms s Frameworks	Proficiency Details
Process Optimization Engineering	Nanofabrication and ALD Process Lithography.	Microsoft Internal Software (MES)	Production C RCD
	Data Center Operations C Network and Hardware Support	Google Internal System, Application and Software	Diagnosis, Troubleshoot, Components Swaps, Server Repair, Networking, Cabling
	IT Support C Helpdesk	Windows OS (client and server), macOS, Linux distributions, AnyDesk, Remote Desktop Services (RDP)	
IT Operations s Support	Networking	Infoblox (DNS/DHCP/IPAM), VLAN and subnet management tools, Routing Protocol (RIP, IGRP, OSPF, BGP), OSI model, TCP/IP model, TCP, UDP	CCNA1-3, Microsoft Azure
	System Administration	Window (PowerShell, Windows Serve), Linux (Red Hat Enterprise Linux, Ubuntu Server)	
Software Engineering, Web Development s Smart devices, Embedded	Language	JavaScript / TypeScript, C / C++, C#, Python, Java (Basic), Styling (CSS, Sass, Bootstrap, Tailwind CSS, MUI)	Frontend, Backend, API
	Frameworks	.Net, Node.js + Express, React	
	Core Tools	Git (GitHub, GitLab), Jira / Azure DevOps, Docker	
	Databases	PostgreSQL, MongoDB	
	Protocols	MQTT, HTTP/REST, Zigbee, Star, Bus, Mesh	
Insight and Reporting	AI tools		ChatGPT, Gemini, Co-pilot, DeepSeek

Projects:

I've included a few of my IT projects here. You can find more than 30 additional projects on my GitHub.

Name	Description	Source Code	Screenshot, Videos
CarZam LLM Project	CarZam is a full-stack web app that retrieves detailed vehicle data by license plate	https://llm-project-tcha.vercel.app/ https://github.com/Dhakeswor17/carzam_project	https://drive.google.com/drive/folders/1C4Ee43qiOJBzIIX7JTM3ygW24BTYqmkW?usp=sharing
Smart Weather Station	The Weather Station is a comprehensive project designed to provide real-time monitoring of rainfall, and display of temperature, and humidity levels	https://github.com/Dhakeswor17/Project3_smartweatherApp	
world country visualization	The data is fetched from the Rest Countries API and displayed in an interactive bar chart	1. **Document** 2. https://world-county-list-eomz.vercel.app/ 1. https://github.com/Dhakeswor17/worldCountryVisualization 2. https://github.com/Dhakeswor17/worldCountyList	
Heart animation	Mainly for stylist purpose. When mouse is moved, heart animation can be seen.	**Heart_trail_animation** https://github.com/Dhakeswor17/JavaScript-basic-Project	
Password generator	Password can be generated according to user requirement.	Password_Generator https://github.com/Dhakeswor17/Advanced-JS-Project	
Todo App	This is a simple Todo App built using React and TypeScript, demonstrating the use of React Router for navigation, local Storage for persistence, and Bootstrap for styling.	https://my-todo-beta-five.vercel.app/ https://github.com/Dhakeswor17/my-todo	
Barbershop	Barber Shop Finder is a simple web application designed to help users locate nearby barber shops using their current location.	https://barber-shop-flax.vercel.app/ https://github.com/Dhakeswor17/Barber_shop
