PROFESSIONAL SUMMARY

Network and infrastructure-focused engineer with hands-on experience deploying, operating, and maintaining large-scale data center and private network environments. Strong background in network fundamentals, hardware lifecycle management, Linux-based troubleshooting, and operational reliability at scale. Proven ability to work cross-functionally with engineers, program managers, and vendors in high-availability environments such as Google and Microsoft. Detail-oriented, process-driven, and comfortable-owning deployment and operational responsibilities end to end.
Achievements, milestones and Overview Summary: You can review my detailed work history, certificates, and project examples here: Achievements

---

CORE SKILLS

- Network Deployment & Infrastructure Operations
- Layer 2/3 Networking Fundamentals (IP, Routing, DNS, DHCP)
- Private Data Network Operations & Troubleshooting
- Server, Rack, and Network Hardware Lifecycle Management
- Linux-Based Diagnostics & System Monitoring
- Data Center & Metro-Scale Infrastructure Environments
- Preventive Maintenance & Incident Resolution
- Process Improvement & SOP Development
- Automation Mindset (Scripting, Tooling Awareness)
- Cross-Functional & Vendor Collaboration
- EHS, ISO, and Security Compliance

PROFESSIONAL EXPERIENCE

Data Center Technician

Google – Hamina, Finland
April 2025 – Jan 2026

- Execute deployment, maintenance, and decommissioning of server, rack, and network-adjacent infrastructure in a large-scale private data center environment.
- Support reliable operation of Google's private data networks by diagnosing hardware, connectivity, and OS-level issues using Linux command-line tools.
- Perform infrastructure audits, asset tracking, and preventive maintenance to ensure long-term network and system reliability.
- Collaborate closely with Network Engineers, Infrastructure Engineers, and operations teams to support deployment timelines and resolve incidents.
- Follow strict security, safety, and operational procedures aligned with Google data center standards.
- Contribute to operational efficiency by identifying recurring failure patterns and escalation needs during deployments and maintenance activities.

Senior Lab Operator

Microsoft – Espoo, Finland
September 2021 – April 2025

- Operated and supported complex R&D and production lab environments used for hardware development and system validation.
- Performed component-level troubleshooting on mechanical, electrical, and integrated systems supporting advanced hardware platforms.
- Supported infrastructure readiness, testing workflows, and lab deployment activities in coordination with engineering and production teams.
- Developed and improved Standard Operating Procedures (SOPs) to increase operational consistency, safety, and efficiency.
- Maintained compliance with EHS, ISO, and cleanroom standards in precision technical environments.
- Assisted engineers during system bring-up, diagnostics, and failure analysis activities.

IT Support Engineer

SSE Global Technologies – Helsinki, Finland
September 2020 – September 2021

- Provided infrastructure and network support for servers, access control systems, CCTV, and automation solutions.

- Troubleshot network connectivity, IP configuration, and system-level issues across customer environments.
- Coordinated escalations with backend engineers and external vendors to resolve complex technical issues.
- Documented troubleshooting workflows, deployment steps, and operational findings to support continuous improvement.

IT Support and Desktop Support Specialist

Bhat Bhateni Supermarket & Departmental Store
October 2014 – August 2016

- Install, configure, and troubleshoot desktops, laptops, and peripheral.
- Install, configure, and maintain IT systems, devices, and basic servers.
- Provide onsite and remote technical support to end users.
- Assist with new user setup and IT asset management.

EDUCATION

Bachelor of Engineering – Information Technology
Metropolia University of Applied Sciences, Espoo
(Expected 2026)

Bachelor of Engineering – Industrial Engineering
Centria University of Applied Sciences, Ylivieska
2020

TECHNICAL SKILLS

Networking & Systems

- TCP/IP, DNS, DHCP, VPN, Routing (CCNA 1–3 level knowledge)
- Linux system administration and troubleshooting
- Network and infrastructure monitoring concepts

Tools & Platforms

- SSH, Jira, Zendesk, ServiceNow
- Google internal ticketing systems
- MES and documentation systems

Automation & Programming (Working Knowledge)

- Languages: JavaScript, TypeScript, Python, Java (basic), C/C++, C#
- Frameworks: React, Node.js, Express
- Git, SQL, PostgreSQL

Hardware & Diagnostics

- Server and rack hardware
- Mechanical and electrical diagnostic tools
- Component-level troubleshooting equipment

CERTIFICATIONS

- Google IT Support Professional Certificate
- Linux Bash Scripting
- Linux Networking
- Advanced Linux Troubleshooting & System Recovery
- Microsoft Azure AI Essentials
- Microsoft Cybersecurity Essentials
- Lean Six Sigma-Green belt

PROJECTS & PORTFOLIO

- 30+ technical projects covering automation, infrastructure tooling, and software systems
- Demonstrated ability to improve workflows and solve operational problems through engineering approaches.

ADDITIONAL INFORMATION

- Comfortable with travel, on-site deployments, and physically demanding technical work
- Experienced in shift-based and mission-critical operational environments
